High level of English will be necessary.

We need candidates with experience in:

- Vulnerability management (web, mobile...).
- Normative frameworks (LOPD, ISO27001, PCI-DSS...)
- Risk management associated with cybersecurity.
- Incident management.
- Control and hardening of data bases.
- Certificate management SSL.
- Networking (LAN, WAN, Routing, etc.)
- System Administration (Windows, Linux, OSX).
- Perimeter security (NIDS, WAF, CDN, etc.).

### What challenges and tasks can you find in this job?

- Technical consultancy of cybersecurity solutions and services.
- Technical coordination, management and leadership of projects, related with information and infrastructure security.
- Working in collaboration with business development team to generate new opportunities and sales (specialized technologic presale).

### What we offer?

**Type of contract:** indefinite full-time contract (from Monday to Friday).

**Location:** Barcelona or Madrid (Wise offices).

**Salary:** to determinate.

**Flexible Compensation Plan** (food card, transport card, medical insurance and training)

**Work Life Balance:** Flexible work environment and 1 teleworking day per week.

**Fresh benefits:** water, fruit...
