01 / LEARN ABOUT THE ADVANTAGES OF XCERT

- **Scalable implementation with simple integration.**
- Manage the **life cycle of your certificates**, from their application to renewal and revocation.
- Reduce your company's operational costs.
- Access the application simply **via a web browser**.

Wise Security Global is a **trusted third party** that acts as a broker between the parties of an online contract or notification, **guaranteeing and safeguarding** all processes generated in an electronic transaction in a neutral and independent manner. We also guarantee the integrity of the process without any subsequent manipulation and with the content of documents **guaranteed before a notary**.

FUNCTIONALITIES

- **Electronic dating** to ensure that the action has been carried out at a specific time.
- Several **modalities for the application** of certificates: in person, remote and automatic batching.
- Integration with **cryptographic hardware**.
- Access through two factors: **possession of certificates and password**.
